Dear alessandro Fans & Friends

A shared vision has made the alessandro family unique for more than 30 years. First-class quality, continuous innovation and international style come together under the peacock's feathers.

Thanks to the development of our professional formulations, patented "made in Germany" formulae, and customised services, alessandro is the first partner of choice for nail professionals. Fashion fans love the creative and passionate interpretations of the most up-to-date fashion and beauty trends for nails.

Since its founding in 1989, the heart of the brand can be felt every day in the personal interactions between all member of the alessandro community.

This year we are completing the relaunch of the Care division by introducing Foot Spa. The new range represents alessandro's unprecedented success story as well as the belief in the power of the new, a key driver behind our constant search for innovation.

We are looking forward to continuing to share this vision with our customers!

BONDING AGENT

alessandro bonding agents form the basis for uncompromising and strong bonding of all alessandro sculpting gels. The alessandro bonding agents are all-round products that can be applied underneath any UV/LED sculpting gel.

BOND STRONG BONDING AGENT
Bond Strong forms the basis for uncompromising and strong bonding of all alessandro sculpting gels. The slightly acidic bonding agent offers the best bonding even with problem nails and difficulties with adhesion.

01-941 5ml

BOND SENSITIVE BONDING AGENT
Bond Sensitive forms the basis for uncompromising and strong bonding for sensitive customers or damaged nail plates. Enhanced with keratin, biotin and caffeine, Bond Sensitive provides a smooth, strong basis for all alessandro sculpting gels.

01-961 5ml

BOND ULTRA STRONG BONDING AGENT
Light-curing bonding agent with an acid content of 10%. It is particularly recommended when changing from highly acidic products and solvents and from powder-liquid systems. For moist, oily natural nails with a tendency for lifting.

01-959 7.5ml

PEDI BASE COAT
Pedi Base Coat offers the perfect acid free basis for any light-curing colour pedicure. It forms the best primer coat with strong adhesion, smoothing uneven nail surfaces and protecting sensitive nail plates against discolouration. Pedi Base Coat cures under UV/LED light and is only suitable for toenail application.

01-038 10ml

PREP & PRIME
Prep&Prime is more than a classic dehydrator. The acid-free ingredients remove oil, dehydrate and prime the natural nail, whilst perfectly preparing the nail surface for the following products. The dehydrator air-dries, so no curing is required. The bonding booster strengthens the adhesion of light-curing base coats and bonding agents many times over and can be applied underneath PROLAQ, Lac Sensation, Bond Strong/Sensitive (not suitable underneath Striplac or nail polish).

01-485 10ml

SCULPTING GEL

alessandro UV/LED gels offer the best formula for all customer wishes and any nail type.

Depending on your requirements in perfect sculpted nail material, you can choose between the two consistencies – honey-like (self-smoothing) and jelly-like (can be sculpted).

The gel range is completed with camouflage, French and sealing gels.

alessandro SCULPTING GELS

FX-ONE

alessandro FX-One Hard Gel is the perfect acid-free all-round gel with reduced heat response for quick refills, nail sculpting and natural nail strengthening. It is suitable for any nail type and any working technique, and cures under all UV/LED lamps. The honey-like, self-smoothing consistency makes it very easy to use with no complex sculpting required, guaranteeing minimal reworking of the surface if applied correctly.

SOFT CODE

The modern acid-free soft code gel system meets all of the requirements in professional nail sculpting and natural nail strengthening. The jelly-like gels have a stable consistency and slowly self-smooth on the surface. They can be sculpted with a brush and a gel stick and are suitable for all nail types and application techniques.

The variety of consistencies and degrees of curing that result from the curing process ensures that all nail types can be handled perfectly.

SPEED GEL

The innovative speed gel is impressive with its quick application and easy working. The honey-like gel smooths by itself, but doesn't spill over the edge of the nail, and doesn't have to be filed at all. Together with White Pearl's low heat feature (1 x 99 sec.), only a small amount of heat is generated. A complete refill is possible in just 30 minutes. The acid-free gel has the perfect shine after curing, without even having to seal it.

STRENGTHENING THE NATURAL NAIL

alessandro natural nail strengthening gels mainly ensure that thin, brittle finger-nails that are quick to tear become more stable nails.

Our new **Protecting Base Gel** protects yours natural nails, making them stronger and more beautiful and ensures even growth of the natural nail.

natu/GEL offers targeted solutions for sensitive nails and reduces nail damage thanks to its active ingredients. The main active ingredient, BIOGLASS, has its roots in the medical field and gently helps damaged nails to heal.

Fibre gels are fibre-enhanced, honey-like brush-on gels for fast refills, strengthening natural nails or creating new sculpted nails. The high level of stability makes the nail resistant and extremely resilient. (Only suitable for short extensions!)

POLYACRYLIC GEL

AcryLOVE polyacrylic gel combines the best qualities of acrylic and gel in a single product. In terms of technique, it is exactly like acrylic – without the labour-intensive mixing. It is completely odourless and provides an unlimited application time until cured by UV/LED without running off the edges of the nails. After curing, AcryLOVE is ultra-light on the nails, but still harder than classic gel and more flexible than traditional acrylic.

STEP BY STEP

1.

PREP AND PRIME

Prepare the natural nails as usual, by removing the cuticle and matting and removing oil from the nail plate. Apply a thin layer of bonding agent and cure briefly under UV/LED.

2.

NAIL SCULPTING

Sculpt the nail structure into the desired shape and length with the polyacrylic gel on the natural nail, sculpting form or tip and cure under UV/LED light.

3.

SEALING

For a high shine finish, seal the sculpted nail with one of the alessandro Ultimate Shine gels and cure under UV/LED light.

ACRYL POWDER LIQUID SYSTEM

You don't need a UV lamp for these acrylic nails. The sculpting compound made from the liquid and the powder can be simply shaped into a soft a ball on a surface.

Next, it can be shaped on the nail using a sculpting form technique.

It air dries in seconds and can be immediately filed to the desired shape. You can achieve perfect nails of any desired length.

STEP BY STEP

1.

PREP AND PRIME
Prepare the natural nails as usual, by removing the cuticle and matting and removing oil from the nail plate with Liquid Prep. Apply a thin layer of Acrylic Liquid Bond.

2.

NAIL SCULPTING
Sculpt the nail structure into the desired shape and length with the powder and liquid on the natural nail, sculpting form or tip.

3.

SEALING
For a high shine finish, polish the nail or seal the sculpted nail with one of the alessandro Ultimate Shine gels.

 You can find brushes on p. 74

POWDER UP

Stronger natural nails and shorter sculpted nails are now even easier with POWDER UP technology. This incredibly simple to use system for long-lasting, natural, stronger nails will immediately impress.

STEP BY STEP

1. Prepare the natural nail as usual, and apply a thin layer of POWDER UP Bond to the whole nail for an optimum adhesion.
2. Apply the POWDER UP Base.
3. Use the curette (Ref. No.: 45-103) to sprinkle the powder of your choice over the nail while it is still damp. Collect any excess or fallout with a dampen dish (Ref. No.: 01-896). Repeat the application of the base and powder until the coating has reached the desired thickness.
4. Once the desired thickness is reached, apply the POWDER UP Activator to the still damp nail using the tip of the brush to speed up the setting process. Apply another coat of activator after approx. 10 seconds. If necessary, buff over the nail with a very fine nail file to achieve the desired shape and apply the activator once again.
5. After a brief wait, seal the nail with POWDER UP Finish.

COLOUR GEL

alessandro also offers the right product for every customer wish in the world of colour. Our traditional colour gels in jars are easy to paint on thanks to their creamy consistency. There are many highly pigmented colours available.

UV/LED COLOUR GEL

The well-proven alessandro colour gel system with 99 colours offers many benefits, like perfect, streak-free coverage and a particularly creamy texture. The colour gel reliably cures under UV and LED devices.

UV/LED GLITTER GEL

A bit of glitter never hurt anyone!
You'll be guaranteed to make the nails eye-catching with sparkly glitter colour gels.

LED COLOUR GEL 2.0

The latest generation of colour gels impresses with brilliant colours and intensive coverage even in the first layer of colour. The colour gels are especially developed for super-quick curing under modern LED devices to keep their colour even in the sun and in chlorinated or salt water.

LED Colour Gel 2.0

FX-ONE COLOUR & GLOSS

The latest generation of colour gels in brush bottles, FX-ONE Colour & Gloss, combines colour and sealant in just one product, can be cured without sticky residue and ensures an ultimate high-gloss colour finish.

STEP BY STEP

1.

PREPARATION

Prepare the nail as usual and apply conventional UV gel sculpting.

2.

FILES

Smooth the surface of the sculpted nail using a file of your choice and then buff the entire nail.

3.

APPLICATION

Thoroughly remove filing dust from the nail and then apply FX-One Colour&Gloss to the nail with even, slow strokes. Make sure to apply a thin layer of the polish. Cure the colour gel under UV/LED light. Repeat the process if desired.

PROLAQ

PROLAQ offers a revolutionary alternative to traditional UV nail polish treatments. By using state-of-the-art plastic bonds in combination with nourishing additional ingredients, PROLAQ stands out from the crowd for more than just its gentle yet uncompromising adhesion. The PROLAQ system offers long durability and quick removal speeds without damaging the nail plate.

STEP BY STEP

1.

BASE COAT

Apply a thin layer of the PROLAQ UV Base Coat to the natural nail. Carefully seal the nail tip. Cure under UV/LED light.

2.

COLOUR

Apply a thin layer of the desired colour over the entire nail. Cover the nail tip. Cure under UV/LED light. Repeat the process for more vibrant colour.

3.

TOP COAT

Seal colour polish with Top Coat and cure under UV/LED light. Remove the sticky residue using Glossy Finish.

CARE

Care for hands, nails & feet that make the perfect statement

Touch, feel, love – our hands speak many languages. They can be supple with tight grip, make contact with others and express feelings and moods. Our feet support us, ensure we are balanced and allow us to move. We demand top performance from them for a lifetime.

alessandro knows how important hands and feet are in our lives. That's why they only deserve the best care.

alessandro **ACADEMY**

Education and training – from beginner to professional

The alessandro ACADEMY is one of the most experienced education centres in the field of nail design and is known for its high quality standards – which especially applies to the well-established education and training of nail stylists.

Working together with experienced experts, alessandro has also developed the concept of holistic, gradual and practical training for nail stylists.

The alessandro ACADEMY guides you in whatever training you desire and forms the best basis for professional development or self-employment.

All seminars are given using the latest research findings and state-of-the-art techniques. alessandro's training team consists of highly qualified experts who are passionate about their 'craft' and who live and love it every single day. Through years of training experience, they all also have the talent to be able to convey technical content and techniques in an understandable way. So learn from the masters and benefit from their experience that you can also refer to at any time after training. This will give you stability and security in your career.

No master has ever fallen from the sky, but we can make one out of you!
